

COURSE: (SL-2002) SOFTWARE DESIGN AND ARCHITECTURE LAB
LAB TASK # 2

Submit the .vpp file and a pdf file containing the screenshot of the use case diagram, write your assumptions while drawing the use case diagram in the pdf file if any.

- You are required to make a use case diagram in visual paradigm for Daraz app using the following requirements/features:

A customer can login, search for the items, add them to favorites, place an order by making a payment. The customer can make payment either using a credit card or cash on delivery. After the checkout, he can view the order receipt(optional). Similarly, a seller can login, and manage products (add product, delete product, update product), accept or reject an order. Further after accepting an order the receipt must print.
