

COURSE: (SL-2002) SOFTWARE DESIGN AND ARCHITECTURE LAB
LAB TASK # 1

- Think of any product/software, Write a user story, acceptance criteria and generate all possible test cases. Do this task in word and submit the pdf.
- You are the Product Owner for a task management tool. Your team is preparing for the next sprint planning session. Create a user story, define acceptance criteria, and list two test cases for a feature that enhances task collaboration within the tool.

Do your task in a group or solo. Group members should not exceed 2.
